Art Unit: 1711

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-8, drawn to sprayable composition, classified in class 524, subclass 780.
- II. Claims 9-14, drawn to method for coating, classified in class 427, subclass 136.
- III. Claims 15-20, drawn to apparatus, classified in class 425, subclass 86.
- IV. Claims 21-24, drawn to foamable composition, classified in class 521, subclass 82.
- V. Claims 25-32, drawn to method for forming coating, classified in class 427, subclass 180.

The inventions are distinct, each from the other because of the following reasons:

Inventions II. & V. and III. are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the processes as claimed can be practiced by a materially different apparatus such as a spray can.

Inventions I. and IV. are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed towards divergent materials not capable of use together and having different functions.

Art Unit: 1711

Inventions II. and V. are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and are not capable of being practiced together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

No telephone call was made in the instant case due to the number and complexity of groups.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to John m Cooney at telephone number 703-308-2433.
